

Non Slip Tape

Description:

Safety Stride Non-slip Tape is designed to dramatically reduce the risk of slipping in residential, commercial and industrial environments. Safety Stride can also supply virtually any colour, grade or width as requested, depending on volumes. We also offer OEM services including custom die-cutting. Contact us today to obtain a quote.

Safety Stride Non-slip Tape can be used on stairs, boats, safety lines, walkways, bathrooms, pool areas, factory floors and fire stairs etc. Allow us to recommend which tape is suitable for your application. Technical data available on request.

Our range of non-slip tapes have been used extensively throughout Australia for the last 8 years. All tapes come self-adhered with an aggressive water-resistant adhesive on their underside.
