

RMSS

Description:

RMSS designs, develops and deploys best practice risk management software that embraces the Australian Risk Management Standard AS/NZS 4360 for complete enterprise risk management. Using a unique patented process of Master Risk Categories (e.g. Health and Safety, Security, Projects, Environment, Liability, Public Image, Strategic and more) our products are user customized to integrate with existing business processes and risk management models.

Combine this flexibility with our mobile capability using synchronized PDA™s to conduct inspections, audits and assessments that reduce time and provide efficiency and productivity gains across the organisation.
